### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 25 May 2010.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

## **DETAILED ACTION**

### ***Response to Arguments***

Applicants' elections of Invention Group II, drawn to an evaporation source apparatus, Claims 9-16, in the response filed on 05/25/2010 is acknowledged.

However, upon further consideration, the new examiner regards further election of Species reading into various Figs. A new election of Species is therefore required.

Applicants are free to elect on the Invention Groups or the following Species without being bound to the previous election.

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, drawn to a method.

Group II, claim(s) 9-16, drawn to an evaporation source.

The groups of inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature of these two groups is evaporating a sublimation evaporation material for use in a vacuum deposition method, with the provisions of claim 1, for example, the particular heating container, the evaporation material being evaporated in a particular area and emitting the vapor to a deposition substrate. De Rudnay (US 4748313) teaches these features in column 9 line 21-52 and Figure 5.

Each invention group further contains the following Species:

Group I, method:

Claims 1-2: Generic.

IA) Claims 3, 4, 6, 7, and 8: Read into Figs. 5-7 and 8-9 (with powdered grain).

IB) Claims 5-7: Read into Figs. 1 and 10 (with molded compact).

Group II, apparatus:

Claims 9-10 and 13: Generic.

IIA) Claims 11 and 14-16: Read into Figs. 5-7 and 8-9 (with powdered grain).

IIB) Claims 12, 14, and 15: Read into Figs. 1 and 10 (with molded compact).

The special technical feature of these two groups of Species A and B which is missing from US 4748313 is a supply aperture. Aloysius (US 2950523) teaches a holder of compact powder with a supply aperture (See Figs. 1-4, col. 3, lines 50-54).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If

claims are added after the election, applicant must indicate which of these claims are readable on the elected invention or species.

Should applicant traverse on the ground that the inventions have unity of invention (37 CFR 1.475(a)), applicant must provide reasons in support thereof.

Applicant may submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case.

Where such evidence or admission is provided by applicant, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to KEATH T. CHEN whose telephone number is (571)270-1870. The examiner can normally be reached on 6:30AM-3 PM EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Cleveland can be reached on 571-272-1418. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
